DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 6-7, 10-11 and 15-16 are rejected under 35 U.S.C. 102(b) as being anticipated by Goldberg et al. (US 5,317,879 A).

With respect to claims 1, 10 and 16, Goldberg discloses a magnetic resonance imaging assembly comprising (Abstract; as seen on Figure 1): a outer thermal shield having an operational temperature (#20 and #21); and a cold head sleeve assembly comprising: a cold head sleeve (#10), a plurality of braid elements (copper ropes #17, #18, #33 and #34 braided) mounted to a cooler block (cooper station #12 in stage 1 of sleeve), said plurality of braid elements connecting said cold head sleeve to said cooler block (as seen on Figure 2 top view); a highly thermally conductive block (interfaces #23, #37, #38) mounted between said cooler block and said outer thermal shield (as seen on Figure 2), said highly thermally conductive block welded to said outer thermal shield and welded to said cooler block (Column 3, lines 21-40), said highly thermally conductive block having greater thermal conductivity than said outer thermal shield (Column 2, lines 56-62).

3. With respect to claims 6 and 11, Goldberg discloses a cooler block comprised of copper (Column 2, line 63).

Art Unit: 2859

4. With respect to claims 7 and 15, Goldberg discloses said operation temperature is less than 50 degrees Kelvin (Column 2, line 63).

Allowable Subject Matter

5. Claims 2-5, 8-9, 12-14 and 17-20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Response to Arguments

6. Applicant's arguments filed 04/27/07 have been fully considered but they are not persuasive.

7. Applicant argues that Goldberg fails to teach or fairly suggest two independent elements, a cooler block and a thermally conductive block.

8. The examine disagrees with applicant's argument because Goldberg discloses two different elements a cooler block (Figure 1, #12) and a thermally conductive block (Figure 1, #23, #37, #38) as stated in the 35 U.S.C. 102(b) rejection above wherein the conductive block (#23) is located between the cooler block (#12) and the shield (#20) in axis (#6).

Conclusion

9. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 2859

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
